

Save **\$15,000+** on a 100-unit project with EverFab showers

And much more over a 15-year period

98% savings on warranty, trade damage, and repair coordination

New EverFab customers quickly see how much time they lost managing fiberglass trade damage and warranty repairs – even when the repairs were “covered” by the manufacturer.

As much as 1 hour of project administrative time is required for every 2 hours of repair work performed. Admin time includes inspecting and counting defective showers, calling/emailing the manufacturer, scheduling repairs, coordinating trades, etc.

Average trade damage cost and defect rate

	Traditional Fiberglass Shower	EVERFAB
Trade Damage	\$56/unit	\$1.25/unit
Defect Rate	12%	0.5%

25% savings on installation labor and materials

EverFab’s custom Rhino Bottom™ support plate coupled with our composite core reinforcement eliminates the need for mortar beds and wood backing. Our composite core material and high resin content also means our showers weigh up to 50% less than our competitor’s showers. That means they need less manpower to maneuver and install

*Assuming a traditional shower installed with a mortar bed

**Based on industry data and EverFab bookkeeping over its 5 years and 65,000 showers delivered
